- Team Player
- Positive Attitude
- Hardworking

## PROJECTS

1. Instagram Clone (React + Redux Toolkit + Socket.io)
  - Developed a dynamic full-stack application with features like real-time chat and notifications using Socket.io.
  - Integrated RESTful APIs with MongoDB for CRUD operations (posts, comments, likes).
  - Implemented Redux Persist for efficient state management and optimized user experience.
2. Shopping Dashboard (React + Axios + Routing)
  - Built a shopping website dashboard with CRUD functionalities.
  - Designed secure login/signup flows and seamless navigation using React Router.
  - Enhanced user experience through responsive design and modular components.
3. Expense Tracker (React + Context API)
  - Created an intuitive expense tracker for managing income and expenses.
  - Implemented features to add, edit, and delete transactions.
  - Ensured mobile responsiveness for smooth cross-device usage.
4. Personal Portfolio (React + React Router + Bootstrap)
  - Designed and developed a personal portfolio showcasing skills and projects.
  - Implemented responsive layouts and smooth navigation to highlight development expertise.
